Announcement of a session on "Microbial Corrosion and Biofouling Issues in Marine Environments"

EUROCORR
THE ANNUAL CONGRESS OF THE EUROPEAN FEDERATION OF CORROSION
PRAGUE 2027
23TH INTERNATIONAL CORROSION CONGRESS
ICC PRAGUE2027

Don't forget…abstract submission deadline: January 31, 2027!

In a natural marine environment, the corrosion process of metals and alloys always involves the influence of microorganisms and macroorganisms that quickly colonize immersed surfaces. A thick and complex biofouling dynamically evolves affecting the performance of technological materials. This forces antifouling countermeasures which constitute relevant environmental and economic costs for the marine sector. The joint session "Microbial corrosion and biofouling issues in marine environments" gathers papers that report studies addressed to document, understand, and prevent microbially influenced corrosion (MIC) processes in marine environments and related antifouling/anticorrosion strategies

Session organiser(s):

Marc Jeannin
La Rochelle University
WP 10 – Microbial Corrosion

Philippe Refait
La Rochelle University
WP 9 – Marine Corrosion

Expected duration: **1** day

Expected audience: 30-50 persons

EUROCORR
The European Corrosion Congress

EFC
EUROPEAN FEDERATION OF CORROSION

Please submit your abstract online via www.eurocorr.org before the end of January 2027. We are looking forward to your contribution & participation in EUROCORR & ICC 2027 (September 12-16, 2027, Prague, Czech Republic)!
